Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Kitamura (US 6,674,864).

Regarding claims 1-2, Kitamura discloses a method for adjusting the frequency response of a speaker system (Fig. 3; col. 5, line 46 – col. 6, line 20) comprising the steps of:

anticipating a main speaker low frequency sonic output from predetermined main speaker low frequency characteristics (step 72);
determining compensation variables (step 74);
inputting the compensation variables (step 78);
receiving an input signal and producing a high-frequency signal from the input signal (step 82).

Regarding claims 3-4, 17-19, Kitamura discloses a crossover system (Figure 3) comprising:

a user interface (adaptive speaker compensation control interface 12; col. 3, lines 10-12);
and

a compensation circuit (filters with crossover control data 56; col. 5, lines 12-25; col. 5, line 60 – col. 6, line 5).

Regarding claims 5-9, 13-16, graphic user interface 12 allows selection of suitable data for different speaker types (col. 4, lines 7-32).

Regarding claims 10-12, Kitamura discloses a method of adjusting the frequency response of a speaker system comprising the steps of:

determining undesired sonic output characteristics for a main speaker (speaker characteristic data is obtained from the library memory 18; col. 5, lines 25-45, 51-60; col. 6, lines 18-20); and

compensating (DSP modifies the filter configurations based on the speaker characteristic data and crossover data; col. 5, line 60 – col. 6, line 20).

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Townsend et al., Ballard et al., Werbach et al., Goff and Coombs show other adaptive speaker systems.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stella L. Woo whose telephone number is (703) 305-4395. The examiner can normally be reached on Monday-Tuesday, Thursday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Curtis Kuntz can be reached on (703) 305-4708. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
